Impact Community Services, Inc. is a not for profit (501-C3) Social Services Agency, which provides Residential Clinical Treatment for foster care boys ages 13-18 years. Our agency, founded in 1999, is dedicated to providing treatment to foster care children who have struggled with long standing psychological issues, which have resulted in repeated difficulties for the individual. Our mandate is to provide our residents with skills to prepare them for their future post the foster care system.

Impact Community Services is a contracted provider with Child Net and the Florida State Department of Children and Families. We greatly appreciate the assistance that you are providing to an under privileged foster care population.
